

VanS

The **VanS Forms Designer** system is a very powerful tool that makes the VanS system even more valuable by allowing the creation of additional entry screens to accommodate any type of move. Forms are then designed to print information from any of these customized entry screens. Any moving company can have their specific needs met with the ability to tailor screens and forms exactly to their specifications.

Entry Screen Features

- ◆ Forms Designer can be used as the primary point of entry for any order.
- ◆ Enter own authority, van line and even pre-registered orders in one entry program.
- ◆ Define screens for each different type of move. For example, household goods, office & industrial (O & I), commercial, national account, international, etc.
- ◆ Setup prompts and dialog for gathering information on a move.

User-Definable Forms

- ◆ Design forms for in-house documents (trade show, work orders, dispatch cards, etc.) as well as standard move documents (agreement for service, bill of lading, pack list, change order, etc.).
- ◆ Print information from any of the entry screens.
- ◆ Each type of move can have its own set of forms and entry screens.

Interfaces

The order entry in Forms Designer:

- ◆ Tracks estimates, pre-registrations, and booked orders.
- ◆ Updates booked orders to VanS automatically, or individually as needed.
- ◆ Fully integrates with the VanS Memo System.
- ◆ Creates MoveTrak records to immediately begin monitoring the move.
- ◆ Integrates with the dispatching functions in VanS.
