

THOMAS TRANSFER & STORAGE CO., INC.

October 14, 2006

Compusource
4405 International Blvd
Suite B-104
Norcross, GA 30093

Thomas Transfer & Storage Co has been customers of Compusource for almost 20 years. We started with the payroll module and quickly expanded throughout the vans system including accounts receivable, accounts payable, general ledger, driver and sales, and the reporter program. Most recently we have added laser forms, e-mail, and document management. These new systems have allowed us the capabilities to print and e-mail invoices therefore improving our cash flow. The document management system has allowed us easier access to information for all our offices as well as customers, and van-lines. We have found all these systems extremely user friendly. The integration of all the systems has led to better information availability which has saved time and increased productivity and efficiency.

The technical support that Compusource provides for these systems is superior. Any problems we may have are addressed promptly and thoroughly and always in a very positive manner. Throughout the years, the Norcross, Georgia office have become extended family members. I trust every member of that technical team and appreciate their help in not only solving any issues I have but also taking the time to thoroughly trouble-shoot and explain to me the "whys" of what happened so that I may understand.

I would recommend Compusource to any moving and storage company that is interested in improving their technology to contribute to the success of their business. Thank you to contribute to our successes.

Sincerely,

Cindy Evenson
VP of Corporate Accounting
Thomas Transfer & Storage Co
