Letter of Recommendation

We have been using the Compusource software for sometime now and we are completely happy with its performance. Key items that we like are:

Indianapolis, Indiana
888-520-7500
Fax 317-870-7745

- Accounting features – all expected accounting is performed and the system is able to generate an account receivable aging for both agent authority and van line authority orders.
- Reporter – system has a nice report feature that allows for creation of custom reports. This feature is user friendly, easy to learn, and has come in handy many times.
- Technical assistance – is above average. Their tech team is very responsive and are able to solve majority of issues or questions fairly quick.

Grand Rapids, MI

Fax 616-245-4690

Toledo, Ohio
800-711-2177
Fax 419-873-0200

Over the years other suppliers of this type of software have approached us about switching. We always review them to see if such a move is feasible. To determine feasibility, one main question has always been – what will be that much better? Sure, we seen some programs that “look” nicer, but then under more research they either lack a major feature or have weak control features.

Overall, we are very satisfied with this software.

Paul Stema
